# ENGINEERING

## HELLO! FROM THE CURRICULUM AREA MANAGER

Congratulations on securing a conditional offer in the Engineering department. My name is Michelle and I am the Curriculum Area Manager for Engineering. I look forward to welcoming you to the Engineering Centre in September. The Engineering industry remains strong in Kirklees and choosing a career in Engineering can open so many doors for you, locally, nationally and internationally.

a virtual tour!

## KEY INFORMATION AND OPPORTUNITIES

Our Engineering Centre is a world-class facility with state-of-the-art equipment for a whole range of Engineering disciplines, including Fabrication and Welding, CAD, CAM, Machining and more. This year, we have secured a share of £6.9million from the Government's Local Skills Improvement Fund (LSIF) for new digital equipment at our Engineering Centre, including new 3D printers and VR headsets.

As an Engineering student, you will be provided with Personal Protective Equipment (PPE) at the start of your course, but any further PPE needed will have a cost attached. We also ask for a small contribution from students for trips and visits. You should also purchase a scientific calculator and writing equipment (pens, pencil and notebook) before you start your course.

If you are a rugby or a football player, you can also combine your studies with playing your sport by becoming a member of our Sports Academies. Keep an eye on your email account for information about academy trials.

## MEET OUR STUDENTS!

Calum Rowling, Engineering, Manufacturing, Processing and Control Level 3 T Level:

**"My T Level placement has allowed me to gain more in-depth knowledge and insight about the aeronautical engineering sector. This has allowed me to explore what I want to go into in the future."**

## CAREER PROGRESSION

Throughout your time at our Engineering Centre, you will have the opportunity to engage in hands-on training, theory coursework, and real-world experiences that will prepare you for a successful career in the Engineering industry.

Many of our Engineering students apply to university, or progress to degree apprenticeships. We have a dedicated Careers Team at Kirklees College who can help you apply for university, apprenticeships and further training and help you figure out your next steps after college.

Potential career pathways in the Engineering industry include Mechanical Engineer, Welder, Automotive Engineer, Steel Fixer and Rail Track Maintenance Worker.

## WORK EXPERIENCE

As part of our Employability Pledge, you will have work experience embedded into your timetable. If you are on a Level 2 or 3 course, you will work with a dedicated Work Experience Coach, who will help you find a placement suited to your course or chosen career. Alternatively, you will complete work experience to achieve a Careers and Personal Development Passport Award.

## SUPPORTING YOU

At Kirklees College, we are committed to supporting all our students wherever we can. We offer a wide range of specialist support which is carefully allocated to ensure help is accessible to everyone who needs it.

### Types of support on offer:

- Financial
- SEND
- Counselling
- Sexual Harassment – Call It Out
- Exam Support
- Careers & Employment
- Health and Wellbeing
- Support for Care Leavers and Children Looked After
- Support for Young Parents, Young Carers and Estranged Students
